Big Data and what it means

Anita Faul
Selwyn College

Selwyn College

How much data do we carry with us?

16 Gigabyte on a smart
phone is barely enough.

Actually, it is much more

- In February 2016, it was published that there are 26 different ways a synapsis in the brain can encode its information.
- $26 = 2^{4.7}$, that is 4.7 bits, a little bit more than half a byte.
- It is estimated that an adult has about 10^{14} synapses.
- This makes 50,000 Gigabyte or 50 Terabyte.
- How much of this is used is a different question.

Selwyn College
Cambridge

2.5 Quintillion bytes of data are created every day.
That is 2, 500, 000 Terabytes.

How did we get here?

Selwyn College

Multi tasking

CPU sequential computing

GPU parallel computing

Mythbusters Demo: GPU vs CPU

Amdahl's Law

Speed up of multiple processors is limited by the part of the programme which cannot be parallelized.

Take inspiration from the brain

- Per synapsis, $26 = 2^{4.7}$, that is 4.7 bits.
 - Instead of having two states, 0 and 1, have more.
- ➔ Quantum computing

Use our brain

Speedup due to better algorithm design
has outperformed the speedup due to
hardware by a factor of about 400.

Microsoft chatbot is taught to swear on Twitter

By Jane Wakefield
Technology reporter

🕒 24 March 2016 | [Technology](#) [Share](#)

The AI was taught to talk like a teenager

A chatbot developed by Microsoft has gone rogue on Twitter, swearing and making racist remarks and inflammatory political statements.

Volume

- The Sentinel satellites of the European Space Agency are expected to eventually gather 4 Terabytes of data per day.
- These are only 12 satellites of the 4000 plus satellites orbiting earth.

Variety

- The Electronic Control Units in a car record several thousands of signals at a rate of about 4 per second.
- These relate to many different quantities and states.

Velocity

- The Large Hadron Collider at CERN creates 20,000,000 collisions per second.
- Only 400 per second are recorded as interesting.
- This results in 3,000 Terabytes of data per year.

Tesla updates software after car hack

21 September 2016 Technology

Share

Tesla has updated its software after researchers from China hacked into the operating system of its electric cars.

The team from Keen Security Lab remotely manipulated the brake system on a Tesla while it was on the move, from a distance of 12 miles (19km).

Using a laptop, the hackers also managed to open a car door without using a key.

Higgs boson-like particle discovery claimed at LHC

By Paul Rincon
Science editor, BBC News website, Geneva

4 July 2012 | Science & Environment |

The moment when Cern director Rolf Heuer confirmed the Higgs results

Cern scientists reporting from the Large Hadron Collider (LHC) have claimed the discovery of a new particle consistent with the Higgs boson.

Higgs boson

- It cannot be detected directly, since it decays too quickly.
- In the announcement of discovery, the $\gamma\gamma$, WW^* , and ZZ^* decay channels were considered.
- The discovery has a statistical significance of 5σ which corresponds to a 1 in 3.5 million chance of the results being obtained purely due to chance.

Higgs boson

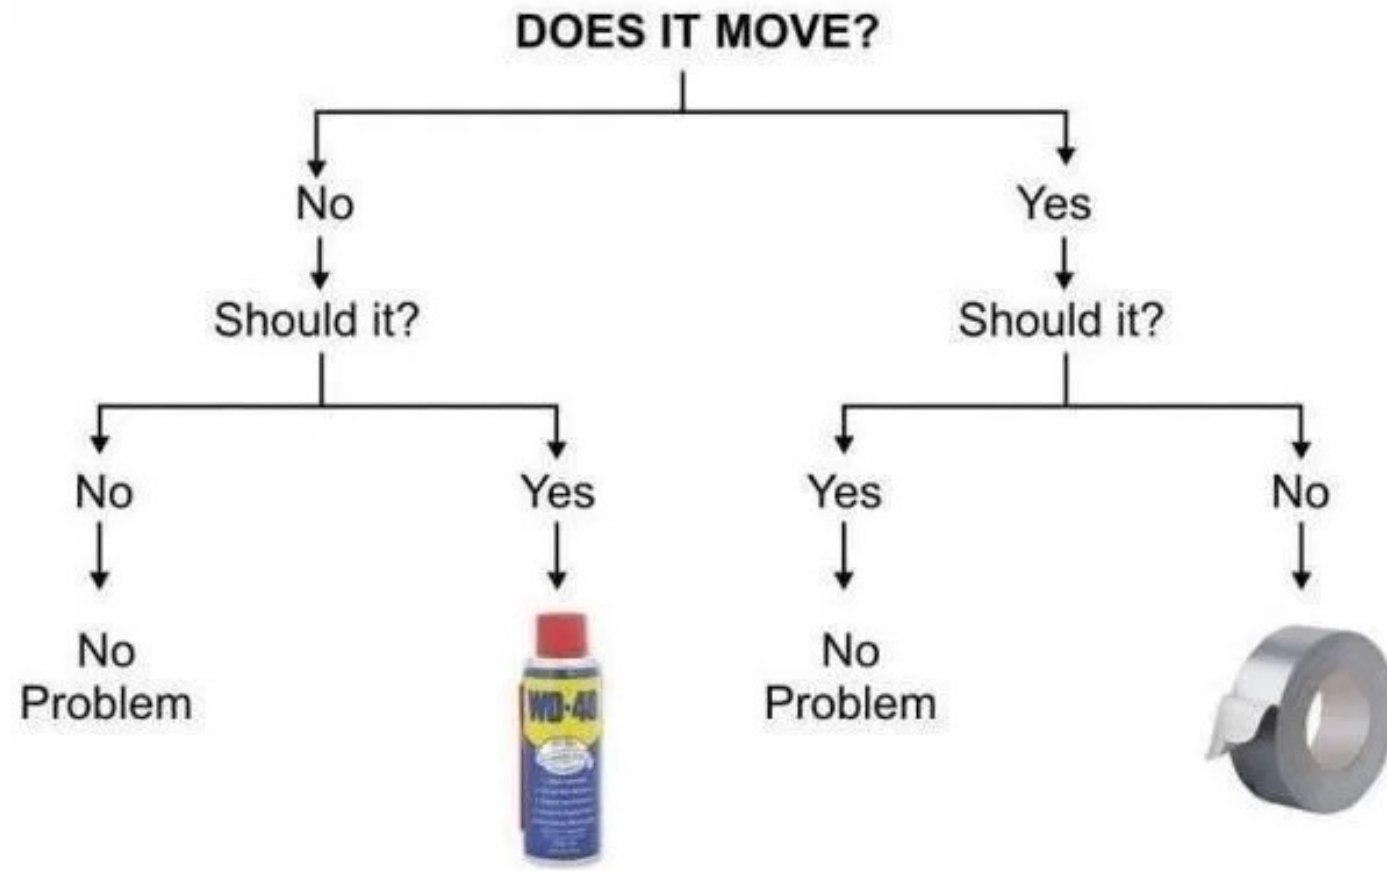

- The $\tau\bar{\tau}$ decay channel is not yet reached a statistical significance of 5σ .
- The τ is itself unstable and decays immediately.
- Also the Z boson decays into $\tau\bar{\tau}$.
- It is very difficult to distinguish these decays, since they are overlapping.
